SUBJECT INDEX

Addenda ions
Homogeneous catalysis by transition metal oxygen anion clusters 407

Alkynes
η^2-Alkyne copper(I) and silver(I) compounds; from polymeric $[M^IR]_n$ to monomeric $[M^IR]$ units (M = Cu, Ag) 113

Aqueous solution
Clusters and water: build-up of multinuclear organometallic compounds in aqueous solution 97

Associative reactions
Associative reactions of metal carbonyl clusters: systematic kinetic studies of some ruthenium and other clusters 265

Bimetallic catalysts
Pt–Re clusters and bimetallic catalysts 457

Boron
Transition metal boride clusters at the molecular level 297

^{13}C-Fullerene NMR
An overview of higher n-fold exo cage spin clusters, including (t-j) m^{13}C-fullerenes, under SU ($m \leqslant n/2$) $\times \mathscr{U}_n$ and model SU(m) $\times \mathscr{U}_n \downarrow \mathscr{G}$ dual spin symmetries of nuclear magnetic resonance 169

Cage fusion
Cluster forming and cage fusion in metallacarborane chemistry 71

Catalysis
Low valent metal clusters — an overview 1
Confacial bioctahedral complexes of molybdenum and tungsten 35
Phosphine-stabilized, platinum-gold and palladium–gold cluster compounds and applications in catalysis 219

Cluster build-up
Clusters and water: build-up of multinuclear organometallic compounds in aqueous solution 97

Clusters
Cluster forming and cage fusion in metallacarborane chemistry 71
Phosphine-stabilized, platinum-gold and palladium–gold cluster compounds and applications in catalysis 219

Cluster-stabilized cations
Cluster-stabilized cations: syntheses, structures, molecular dynamics and reactivity 331

Cobaltacarboranes
Cluster forming and cage fusion in metallacarborane chemistry 71

Confacial bioctahedral complexes
Confacial bioctahedral complexes of molybdenum and tungsten 35
Copper(I) compounds
η^2-Alkyne copper(I) and silver(I) compounds; from polymeric $[M^IR]_n$ to monomeric $[M^IR]$ units (M = Cu, Ag) 113
Cyclopentadienyl
(Cyclopentadienyl) metal cluster complexes of the group 9 transition metals 535

Direct-product spin symmetry
An overview of higher *n*-fold exo cage spin clusters, including (t-$\mathcal{J}$) $m^{13}C$-fullerenes, under SU ($m \leqslant n/2$) $\times \mathcal{U}_n$ and model SU(m) $\times \mathcal{U}_n \downarrow \mathcal{G}$ dual spin symmetries of nuclear magnetic resonance 169
Diynes
η^2-Alkyne copper(I) and silver(I) compounds; from polymeric $[M^IR]_n$ to monomeric $[M^IR]$ units (M = Cu, Ag) 113

Exo cage cluster NMR
An overview of higher *n*-fold exo cage spin clusters, including (t-$\mathcal{J}$) $m^{13}C$-fullerenes, under SU ($m \leqslant n/2$) $\times \mathcal{U}_n$ and model SU(m) $\times \mathcal{U}_n \downarrow \mathcal{G}$ dual spin symmetries of nuclear magnetic resonance 169

Ferracarboranes
Cluster forming and cage fusion in metallacarborane chemistry 71

Group 6–group 9 heterometallic clusters
Hydrocarbyl ligand derivatives of group 6–group 9 heterometallic clusters 501
Group 9 transition metals
(Cyclopentadienyl) metal cluster complexes of the group 9 transition metals 535

Homogeneous catalysis
Homogeneous catalysis by transition metal oxygen anion clusters 407

Hydrocarbon ligands
Hydrocarbyl ligand derivatives of group 6–group 9 heterometallic clusters 501

Icosahedra
Polyicosahedricity: icosahedron to icosahedron of icosahedra growth pathway for bimetallic (Au–Ag) and trimetallic (Au–Ag–M; M = Pt, Pd, Ni) supraclusters; synthetic strategies, site preference, and stereochemical principles 611
Iridium
Associative reactions of metal carbonyl clusters: systematic kinetic studies of some ruthenium and other clusters 265
Iron
Associative reactions of metal carbonyl clusters: systematic kinetic studies of some ruthenium and other clusters 265

Kinetics
Associative reactions of metal carbonyl clusters: systematic kinetic studies of some ruthenium and other clusters 265

Metal carbonyl clusters
Associative reactions of metal carbonyl clusters: systematic kinetic studies of some ruthenium and other clusters 265
Metal clusters
Low valent metal clusters — an overview 1
Metallacarboranes
Cluster forming and cage fusion in metallacarborane chemistry 71
Molecular dynamics
Cluster-stabilized cations: syntheses, structures, molecular dynamics and reactivity 331
Molybdenum
Confacial bioctahedral complexes of molybdenum and tungsten 35
Multidecker sandwich complexes
Cluster forming and cage fusion in metallacarborane chemistry 71

Osmium
Associative reactions of metal carbonyl clusters: systematic kinetic studies of some ruthenium and other clusters 265

Palladium
Phosphine-stabilized, platinum-gold and palladium–gold cluster compounds and applications in catalysis 219
Petroleum refining
Pt–Re clusters and bimetallic catalysts 457
Phosphines
Phosphine-stabilized, platinum-gold and palladium–gold cluster compounds and applications in catalysis 219
Platinum
Phosphine-stabilized, platinum-gold and palladium–gold cluster compounds and applications in catalysis 219

Polyhedral skeletal electron pair theory
Limitations of the polyhedral skeletal electron pair theory in organometallic cluster chemistry: examples in tri- and tetrametallic systems 637
Polyicosahedricity
Polyicosahedricity: icosahedron to icosahedron of icosahedra growth pathway for bimetallic (Au–Ag) and trimetallic (Au–Ag–M; M = Pt, Pd, Ni) supraclusters; synthetic strategies, site preference, and stereochemical principles 611
Polyoxometalates
Homogeneous catalysis by transition metal oxygen anion clusters 407
Properties
Low valent metal clusters — an overview 1
Pt–Re clusters
Pt–Re clusters and bimetallic catalysts 457

Reactivity
Transition metal boride clusters at the molecular level 297
Cluster-stabilized cations: syntheses, structures, molecular dynamics and reactivity 331
Hydrocarbyl ligand derivatives of group 6–group 9 heterometallic clusters 501
(Cyclopentadienyl) metal cluster complexes of the group 9 transition metals 535
Redox chemistry
Homogeneous catalysis by transition metal oxygen anion clusters 407
Rhodium
Associative reactions of metal carbonyl clusters: systematic kinetic studies of some ruthenium and other clusters 265
Ruthenium
Associative reactions of metal carbonyl clusters: systematic kinetic studies of some ruthenium and other clusters 265

silver(I) compounds
η^2-Alkyne copper(I) and silver(I) compounds; from polymeric $[M^IR]_n$ to monomeric $[M^IR]$ units (M = Cu, Ag) 113
Structure
Cluster-stabilized cations: syntheses, structures, molecular dynamics and reactivity 331
(Cyclopentadienyl) metal cluster complexes of the group 9 transition metals 535
Structures
Low valent metal clusters — an overview 1
Subgroup embedding in $\mathscr{U}_n$ spin algebras
An overview of higher n-fold exo cage spin clusters, including (t-j) $m^{13}C$-fullerenes, under SU ($m \leqslant n/2$) $\times \mathscr{U}_n$ and model SU(m) $\times \mathscr{U}_n \downarrow \mathscr{G}$ dual spin symmetries of nuclear magnetic resonance 169
Supraclusters
Polyicosahedricity: icosahedron to icosahedron of icosahedra growth pathway for bimetallic (Au–Ag) and trimetallic (Au–Ag–M; M = Pt, Pd, Ni) supraclusters; synthetic strategies, site preference, and stereochemical principles 611
Syntheses
Cluster-stabilized cations: syntheses, structures, molecular dynamics and reactivity 331
Synthesis
Hydrocarbyl ligand derivatives of group 6–group 9 heterometallic clusters 501
(Cyclopentadienyl) metal cluster complexes of the group 9 transition metals 535

Tetrametallic compounds
Limitations of the polyhedral skeletal electron pair theory in organometallic cluster chemistry: examples in tri- and tetrametallic systems 637
Transition metal clusters
Transition metal boride clusters at the molecular level 297
Trimetallic compounds
Limitations of the polyhedral skeletal electron pair theory in organometallic cluster chemistry: examples in tri- and tetrametallic systems 637
Triynes
η^2-Alkyne copper(I) and silver(I) compounds; from polymeric $[M^IR]_n$ to monomeric $[M^IR]$ units (M = Cu, Ag) 113
Tungsten
Confacial bioctahedral complexes of molybdenum and tungsten 35

Water-soluble organometallics
Clusters and water: build-up of multinuclear organometallic compounds in aqueous solution 97
